## Water Permeable Brick For Plaza

1. Brief introduction: The main raw materials of Water Permeable Brick For Plaza are clay, quartz, feldspar, shale and gangue. After sintering at about 800 °C, the color is mostly different and uniform, which can withstand high temperature, high temperature and cold, corrosion resistance and color fastness. It has not only natural beauty, but also strong cultural atmosphere. The product has good water permeability, air permeability, weather resistance, corrosion resistance and cold resistance. It is an ideal laying product for squares, gardens, streets and leisure places.

2. Characteristics of Water Permeable Brick For Plaza

- 1) Water absorption 8-10%, good water permeability
- 2) Excellent cold resistance, no crack at - 45 °C
- 3) Good sound absorption and light pollution resistance
- 4) Good weathering resistance

3. Application: large square, urban street, garden building and other places

4. Specification: 100\*100\*10mm, 150\*150\*10mm, 200\*65\*9mm and so on.

5. Color: red, yellow, gray, bronze, black, etc

6. Main parameters of Water Permeable Brick For Plaza

ITEM	UNIT	TECHNCIAL INDEX
Water absorption	%	8-10
Permeability	mm/s	≥20
Security		Antiskid value≥60 BPN
Antifreeze value	du	25
Sound absorption		Fine
Erosion resistance		Fine

# ZIBO JINGGAN REFRACTORY IMPORT AND EXPORT CO.,LTD

---

8.Good feedback of product use effect,the products have been exported to South Korea, the United States, Kenya

9.We are a professional supplier, who can provide customers with free product technology, use and other issues.

Do you want to find a professional supplier of refractory products?

Do you want to find a professional supplier of graphite electrodes?

Do you want to find a stable and credible supplier?

Then let's contact with jinggan company
